

DPF Cleaner and Regenerator

PCL 007

For cleaning and regeneration of diesel particulate filter for all diesel engines. Lowers the burn-off temperature of soot in DPF and restores absorption capacity.

Features:

- Regenerates the DPF.
- Reduces soot formation.
- Cleans without elaborate removal.
- Prevents loss of power and increased fuel consumption due to clogged particle filter.

Operation Range:

- For all diesel engines with particle filter.
- Especially recommended to vehicles operating predominantly in short distance driving and city traffic.

Application:

Add the DPF Cleaner and Regenerator to the fuel tank. The minimum fuel level should be 10 litres. For best results use in 40-60L. For prevention use in regular intervals.

Note!

Not suitable for systems with an additive dosing system (Fuel Borne Catalyst)

Product description	Content	Article number	PU
DPF Cleaner and Regenerator	300 ml	1901481	12

Technical Product Data: DPF Cleaner and Regenerator PCL 007

Product Data

	Characteristic	Unit
Colour	Light-brown	
Odor	Solvent-like	
Aggregate	liquid	
Flashpoint	61	°C
Lower explosion limit	0,5	Vol %
Upper explosion limit	7	Vol %
Density	0,79	g/cm ³

The above information is based on our general experience and knowledge at the time of printing. All provided data is considered guidance values that are based on the product composition, the specific use and application method. It constitutes neither an assurance of product properties nor does it release the user from the obligation of performing preliminary tests with the selected product.

The product is continually improved and all technical data in this document will be adapted at any time without notice. Liabilities of any kind can not be derived from it.
