

Petrol Engine Additive

PCS009

Fuel additive for all gasoline engines. For cleaning all components in contact with fuel. Ensures a technically safe and economical operation.

Performance:

- Ensures fuel quality
- Removes oxidation deposits in fuel lines, injection nozzles, cylinders, spark plugs and the combustion chamber
- Increase the octane level and improves performance
- Ensures economical, ecological and safe operation of entire fuel system
- Extends life of catalytic convertors and lambda-sensors through optimal combustion
- Fuel saving thanks to exact fuel injection and balanced combustion

Application:

- With increased fuel consumption
- Preventative at every inspection
- Also recommended for direct injection engines
- When risk exists of unsuitable fuel

Directions:

Add the content of the tin to the tank.
Suitable for up to 60 litres of gasoline.
Fuel amount should at least match the reserve volume.
